TECHNOLOGY ENABLEMENT

- **e-Aushadhi** deployed in **71 new** HWCs.

HEALTH DAY

NATIONAL CANCER AWARENESS DAY

The fight against cancer begins with learning about cancer. Being educated and informed about the disease prepares us to fight it better. CInI observed 02 days of National Cancer Awareness among the Community Health Officers and Staff Nurses in its intervention areas.

2 day National Cancer Awareness day screening and counselling program, Shahdol

The first day was planned as the Village Health and Nutrition Day (VHND) wherein the women and adolescent girls were counselled on self-screening for breast and cervical cancer. The second day focused on general awareness sessions for the community on early detection, risk factors, types of common cancers and the significance of timely medical support towards improving the quality of life.

On the occasion, the health workers also conducted screening and referred the high-risk cases to the district hospitals.

ACHIEVEMENT

Prathmik Swasthya Sampark Karyakram under Knowledge Management Network (KMN)

As part of the KMN initiatives, the CPHC Committee at the Gandhi Medical College held the first Prathmik Swasthya Sampark Karyakram (PSSK) for the orientation of medical education fraternity on primary health care system. The interactive session was attended by the medical faculty, resident and student doctors who got a glimpse of CPHC service delivery and the quintessential role of a Community Health Officer at the Health & Wellness Center.

Faculties, PG & Students participating the interactive session of PSSK

Prathmik Swasthya Sampark Karyakram (PSSK) at Gandhi Medical College, Bhopal

PSSK, based on the Atmanirbhar roadmap of the Government of Madhya Pradesh, is an attempt to build the much-needed connect of the medical education system with primary healthcare ground realities. It is an opportunity for emerging medical school graduates to gain exposure to the peripheral healthcare system and the functioning of the new Health & Wellness Centres.

Recognition to the CHOs at PSSK program

In the session held on the 28th of November 2023, the CHOs presented their effort, difficulties, and achievements in delivering an expanded range of Comprehensive Primary Health Care services at the door steps of the community. The session was widely appreciated by the medical students as it gave them significant insights into the primary health settings and the possible areas of strengthening that can be mutually explored.

NQAS training initiated for the CHOs, Jabua

Mentoring on NQAS preparation done by the Peer CHO to the other CHO, Shahdol
